

Sculpture and Dimensional Studies (Master of Fine Arts)

Special Information About Art-Related Outcomes

Art students define career success differently than many other students, and their beginning jobs out of college reflect this. For graduating artists, our survey includes the question “Are you still making art, or involved in art, in a way that was not mentioned before?” For MFA Sculpture, we found that all respondents are currently showing and selling their work professionally. Despite the fact that no one reported a salary, it is always difficult to determine an annual salary due to multiple sources of income. This includes full- and part-time wages, materials allowance and self-employment. For that reason, we have not included a salary, though on past reports we estimate the annual income to be in the \$30-40,000 range.
